

INFRARED INTERPRETER'S DAILY LOG

Incident Name: Babaganoush WY-WBD-000421	IR Interpreter(s): Max Wahlberg mwahlberg@fs.fed.us	Local Dispatch Phone: Cody Dispatch (307-578-5740)	Interpreted Size: 899 acres Growth last period: 899 acres
Flight Time: 0215 hrs MDT Flight Date: 8/11/2016	Interpreter(s) location: Portland, OR Interpreter(s) Phone: 928-273-0779	GACC IR Liaison: Melinda McGann GACC IR Liaison Phone: 303-275-5211	National Coordinator: Tom Mellin National Coord. Phone: 505-301-8167
Ordered By: Wind River/Bighorn Basin District BLM	A Number: A-24	Aircraft/Scanner System: N149Z / Phoenix	Pilots/Techs: N149Z Flight Crew left: Ed Netcher right: Matt Smith tech: Woody Smith
IRIN Comments on imagery: Good, clean scan in one north/south pass. Limited haloing despite heat intensity. Some very limited cloud streaking.		Weather at time of flight: Mostly Clear	Flight Objective: Map heat perimeter, intense heat, scattered heat, and isolated heat
Date and Time Imagery Received by Interpreter: 8/11/2016 0226 MDT		Type of media for final product: Shapefiles, PDF Map, KMZ, IR Daily Log	
Date and Time Products Delivered to Incident: 8/11/2016 0415 MDT		Digital files sent to: NIFC FTP: http://ftp.nifc.gov/incident_specific_data/rocky_mtn/2016/Babaganoush/IR/20160811/	
Comments / notes on tonight's mission and this interpretation: First IR flight for the Babaganoush incident. Fire size was interpreted at 899 acres including a number of small, disconnected segments of detectable heat outside the main fire perimeter. The fire appears to be well established on both the north and south sides of FS road 213. To the west, the fire was approximately 0.25 miles east of the Shoshone National Forest Boundary. Intense heat was mapped along much of the fire's perimeter, including large pockets of intense heat on the western, northern, and eastern edges of the fire. Scattered heat was detected throughout much of the heat perimeter.
